

ELEGANT EARTH

ESTABLISHED 1988

EXCELSIOR

Excelsior is the fluffy stuff we use to pack our pieces. To help cut down on messy cleanups during unpacking, we bag the non-toxic pine wood shavings, known as Excelsior. We use as many recycled and natural items in our manufacturing and packing processes as possible. In addition to using biodegradable Excelsior, we use repurposed and reconditioned boxes and pallets.

Excelsior has many uses beyond packaging. It can be used for gift baskets or for boxing small gifts. In our showrooms, we use it to fill large voids in containers that are then topped with moss or other greenery. Excelsior makes excellent bedding for animals. Consider donating to your local animal shelter. It's also great for chickens and barnyard animals.

Be creative and find your own use for Excelsior and help us recycle!

Thank you!

The Elegant Earth Team
